AI-GENERATED

AI-Generated (Deepfake Video)

CONFIDENCE SCORE

87 / 100

ANALYSIS SUMMARY				
The video analysis detected an overall AI probability of 87%. Strong GAN artefacts and temporal inconsistencies were found across multiple segments. The facial regions show characteristic deepfake signatures including unnatural blinking patterns and lip-sync drift in three distinct time windows. The optical flow analysis reveals abnormal motion vectors around the mouth and eye regions consistent with face-swapping or re-animation techniques.				
DETECTED SEGMENTS (4 found)				
#	Time range	Type	Label	Severity

1	0s – 5s	gan	Face GAN signature	HIGH
2	5s – 10s	lip_sync	Lip-sync drift	MEDIUM
3	10s – 15s	lip_sync	Lip-sync drift	MEDIUM
4	15s – 20s	gan	Face GAN signature	HIGH
